

FUJINON

NEW FUJINON-MARINER 7x50 MARINE BINOCULARS

- Only 885 grams (up to 33% lighter than other waterproof binoculars)
- 100% waterproof and they float!*
- Maximum brightness—fully coated optics
- High strength, impact resistant polycarbonate housings
- Super accurate (5° maximum error), liquid damped compass (7x50 WPC-XL) with builtin nightlight
- Extra long 18mm eye relief plus foldback rubber eyecups

New performance/value leader in quality marine binoculars. Using ultra-strong lightweight polycarbonate housings instead of metal alloys, the 7x50 WP/WPC cut both weight and cost without cutting corners. They're 100% waterproof with bright fully-coated Fujinon optics and extra long (18mm) eye relief.

The FUJINON-MARINER compass model uses our most accurate compass

—5° maximum error— the same compass found in the independently top rated 7x50 FMTRC-SX.

The compass and reticle display are visible through the left eyepiece. A translucent panel above the compass provides a

Compass-equipped

Standard
7x50 WP-XL

bright view of the heading under daylight conditions. For use after dark, a nightlight is built into the compass. The control pushbutton and battery for the light is atop the night tube. This

exclusive new Fujinon design makes it easier to use and also reduces the chance affecting compass performance.

Inherently buoyant, if your FUJINON-MARINER ever goes overboard, its closed-cell foam flotation neckstrap* will keep it safety afloat. Neckstrap, objective lens caps and unified eyepiece cap are standard accessories.
